

Product Overview

*CREATING BOLD, INTERACTIVE LEARNING
EXPERIENCES AND CANVAS COURSE PAGES JUST
GOT BREEZY.*

Loree Overview

Rapid course development and customisation at your fingertips.

Loree Page Builder simplifies the task of creating effective online learning. With no coding experience required, teachers and educators can create tailored, accessible and interactive Canvas course content quickly and easily.

Loree + Canvas = Easier Course Authoring

Easy To Learn

Loree works by using simple drag + drop content blocks to build course and a range of page templates, you can create interactive online courses after one quick training session.

Intuitive UI

Loree's advanced authoring tool empowers educators to create modern, interactive online courses with ease. Readily supporting academic workflows to deliver consistent course designs across users.

Engaging Content

Embed third-party web content directly into your courses with our iFrame asset. This means that YouTube, Kaltura, Twitter feeds, and H5P content can now be part of your Canvas course.

Powerful Page Design

When it comes to seamless content creation, Loree puts you and your team together. Whether you're an experienced learning designer, a teacher, a senior stakeholder wanting to review content, or academics looking to share best practice, Loree has you up and running in minutes – just log in to your LMS instance to start building interactive and media-rich courses with a simple drag-and-drop interface. Absolutely no programming skills are required!

Loree + Canvas = Good Design

Loree Editor

Create course pages with text and page elements simply and easily within Canvas.

Design & Share

Create and collaborate with pre-defined templates, colour palettes, images and custom building blocks.

Admin Portal

Manage user roles, share global templates, set brand colours to standardise design across your school.

Media Integration

Media assets such as images and video can be uploaded directly into Loree and saved to your course shell.

Accessibility Checker

Make sure all your learners have accessible well designed content to meet their learning needs.

Inbuilt Word Counter

To help keep page copy and content consistent and adhere to any course design requirements.

Google Font Integrations

Fully integrated with Google Fonts to provide even more font choices and selections for your courses.

H5P and Interactive Content

Make learning more engaging with Loree Interactives and fully integrated H5P components.

Loree = Better Learning

K - 12

Not only can Loree help make learning fun with content where students can interact with course materials. It can also improve learner focus & learning outcomes by standardising the look and feel of learning across the entire school with templates.

Higher Education

Higher Education (HE) institutions need well designed, accessible and engaging content to drive better learning experiences. Loree can be rolled out across entire faculties and institutions to create an easily recognisable learning environment.

Vocational Education

Leverage the power of templates to design sleek, modern course pages that suit the learning styles of adult learners. RTOs use Loree templates to rapidly build and deliver 100+ page courses within three weeks cutting course development costs.

Loree + Canvas = The Good Life

Forget about unnecessary coding skills and boost productivity. Using the Loree templating tool and sharing global templates across your school, district or faculty can cut course development time and effort in by over fifty percent. Giving precious time back to educators to focus on what they do best. Teach!
