

Product Overview

*SUPPORTING STUDENT SUCCESS THROUGH
MEANINGFUL LEARNING EXPERIENCES*

What is OLCi?

OLCi is a Learning Insight and Experience Platform (LIXP) for Higher Education, that drives meaningful learner experience and engagement ensuring that every learner succeeds.

Our intelligence platform helps institutions provide high quality support across the student journey. With the power of predictive analytics, we help learners succeed from their first day to their last day.

Unlock Better Outcomes

Unify Your Data

Institutions have already invested in multiple systems that help manage many operational tasks from student information, enrolment, and reach more learners with your LMS to scale instruction. Often these systems operate in a silo, but when transformed and unified with a system of intelligence, the potential and power of data is game changing.

Insight Driven

Once, colleges and universities unlock the potential of their data, with a system of intelligence, learner success trajectories can be improved at scale. Our Learning Insight and Learning Experience Platform processes data from your systems of record and engagement, to provide you with high quality predictive intelligence geared towards better learning outcomes.

Changed Outcomes

OLCi, moves institutions beyond disparate data points and disconnected initiatives to a unified approach. With data-informed innovation and actionable intelligence, you can change the trajectory of your learners success by equipping your team with the data they need to take action and provide support to learners to create more engaged and successful learners.

Powerful Learning Insights

Our platform allows you to gain valuable insight from every single learner interaction and create an iterative cycle of predictive analysis to help you refine your institution-specific model, driving meaningful learning outcomes.

OLCi is equipped with institution-specific data and actionable knowledge points to create custom predictive models – not just models using some of your data. We work side-by-side with institutions to provide relevant insights and deliver better learning pathways.

OLCi Platform Features

Learner Information

Use Student Information Systems to anticipate prospective learner needs and give your team the tools to drive retention and support services.

Learning Activity Success

Use OLCi to connect with your LMS and academic systems, to help identify learning trends and performance outcomes to drive success.

Learning Engagement

Understand how your learners interact and engage with learning content, peers and instructors to power more meaningful engagement.

Learner Signals

Leverage AI and early alert systems to identify learners at risk and implement support programs to provide point of need support to learners.

Pathway Recommendations

OLCi uses RAISEC profiles to assist with degree alignments and help learners make better informed and successful learning pathway decisions.

Adaptive Learning

Identify learning needs and customise learning activities to better suit each learner. Predictive analytics also help educators perform better.

OLCi Benefits

The power of OLCi isn't about predicting what will happen. It's about providing educators with invaluable and insightful information about what could happen to their learners unless they take action to better support their learners.

OLCi provides institutions a scalable, transparent solution for measurably improved learning outcomes. Ultimately, driving a more meaningful and empowering learning experience for learners.
